

Payroll and human resources solutions

Paylocity

California Critical Access Hospital Network partners with Paylocity to deliver customizable, all-inclusive solutions to help members with the major aspects of Human Resources management.

Members who utilize this system can save an average of 20% in payroll administration costs, shrink HR costs by \$15k per \$100k in payroll, and reduce HR administration time by three hours a week.

Paylocity provides members with instant access to data; trend reporting to analyze the workforce and enable data-driven decisions; and one database for all things payroll and HRIS. Because everything is cloud-based, there are no requirements such as building interfaces or maintaining hardware, and the only system requirement is an internet browser.

Paylocity offers comprehensive solutions in six major areas:

Payroll Administration: Simplify payroll with intuitive, powerful cloud software that reduces administrative burden and puts real insight and analytics at your fingertips.

Human Resources: Advance your HR department with modern tools and functionality that gives employees, supervisors, and managers power to manage their HR data and tasks.

ACA Compliance: Alleviate the stress of complying with the Affordable Care Act (ACA). Paylocity's unique ACA Compliance Solutions minimize administrative burden and ensure compliance.

Benefits Administration: Automate and simplify benefits enrollment with a user-friendly, intuitive tool. Paylocity WebBenefits includes Carrier Connections and Benefit Billing Audit.

Time & Labor: Maximize workforce productivity and gain insight into time and attendance data with an integrated solution that gives you the flexibility and scalability you need.

Talent Management: Deliver progressive, effective talent management with built-in tools for reviews, goal management and peer-to-peer recognition, and more.

**Working together to strengthen
the health of our communities**
